

Vegetable oil filling capacitor with square stainless steel case type Y66

1、 Outline:

2、 Characteristics:

- Micro segment metallized polypropylene film
- Low inductance
- Low loss
- Low ESR
- Withstand high current
- Withstand high surge current
- Self healing
- Long service life
- Easy to install
- Large capacitance volume ratio
- High field strength

3、 Applications

Electric locomotives, high-speed rail, EMUs, subway, light railway, ship propulsion and high power industrial frequency converter.

4、 Performance indicators:

Rated voltage	500Vdc~6000Vdc
Rated capacity	100μF~61000μF
Capacitance tolerance	±5% , ±10%
Dielectric Loss Tangent	2×10^{-4}
Loss Tangent	$\bullet 20 \times 10^{-4}$ (1V, 100Hz)
Withstand voltage between terminals	1.5Un, 10/60s
Withstand voltage between terminal and case	(2Un+1000) Vac, 60s
Operating temp. (case)	-40°C~+70°C
Hot-spot temperature	-40°C~+85°C
Expected life (hour)	> 100000
Climate category	40/85/56
Encapsulation	Stainless steel or aluminum
Impregnant	Plant oil
